1 (In open court.)  
2 THE CLERK: All rise.  
3 JUDGE WOLFSON: Thank you. Everyone may be  
4 seated.  
5 I have received the status report. I guess,  
6 unfortunately, when you drafted the report, you had  
7 not yet gotten Judge Pisano's letter order or opinion.  
8 Correct?  
9 MS. PARFITT: That's correct, your Honor.  
10 MS. SHARKO: That's correct.  
11 JUDGE WOLFSON: Much of what you put in your  
12 letter was to alert me to the disputes, which have now  
13 been resolved by him. So that is where we are.  
14 MS. PARFITT: Your Honor, may I be heard with  
15 regard to Judge Pisano's order, if you will?  
16 JUDGE WOLFSON: Sure.  
17 MS. PARFITT: Thank you. I appreciate that.  
18 Your Honor, we received Judge Pisano's  
19 recommendations with regard to permissible discovery  
20 that we could entertain prior to the filing of our  
21 expert reports, and we strongly disagree and object to  
22 the recommendation of Judge Pisano with regard to the  
23 limitation.  
24 We understand that your Honor has a procedure  
25 wherein we can object to the findings of fact or the

1 rulings of Judge Pisano, and we are certainly --  
 2 that's something that we are considering doing, if not  
 3 planning on doing.

4 But before that, your Honor, the reasons  
 5 being, and just a few. Obviously, we would elaborate  
 6 more in any formal pleadings that we would file  
 7 subsequent to today.

8 JUDGE WOLFSON: And I did receive because I  
 9 was copied on all the letters that were sent to him on  
 10 the issues. So I've reviewed them when they came in.

11 MS. PARFITT: Excellent. I appreciate that.

12 And what we would try to do is, obviously, be  
 13 more succinct in any follow-up objection. But a few  
 14 of them being this, your Honor.

15 I know this in light of the fact that you are  
 16 and we are representing now I guess it's grown to 5500  
 17 women in this litigation alone whose rights are  
 18 impacted by our actions as attorneys. And we believe  
 19 strongly that their rights would be indisputably  
 20 impacted if we were limited to the depositions that  
 21 Judge Pisano has indicated at the state.

22 I recognize Judge Pisano has indicated after  
 23 we propound our expert reports additional fact  
 24 discovery would be undertaken. But what I'm concerned  
 25 about now is this period of time.

1 Imerys, not PCPC, and at one point in time the parties  
 2 had actually said that was fine, had acquiesced.

3 Now, I know since we've had our hearing with  
 4 Judge Pisano they have withdrawn that option. But  
 5 perhaps in light of the breadth of the discovery that  
 6 we feel reasonably is relevant to the issue of general  
 7 causation and what the experts will be opining on,  
 8 that perhaps we step back a moment and consider the  
 9 options of perhaps broadening beyond where Judge  
 10 Pisano has gone.

11 I simply raise that, your Honor, because this  
 12 would seem to be the point in time to do that.  
 13 Otherwise, we will assess where we are and then do  
 14 what we feel is appropriate on behalf of the women  
 15 that we represent.

16 But I raise that with the Court because  
 17 sometimes talking through these things, once we've all  
 18 had a chance to synthesize it, is an appropriate way  
 19 to do things and perhaps a proper way to do it.

20 JUDGE WOLFSON: Ms. Sharko.

21 MS. SHARKO: In a word, no. We think that  
 22 Judge Pisano got it right. His ruling was fair. The  
 23 standard for reversing someone like Judge Pisano on  
 24 appeal is very high. Those names were floated and  
 25 tentative offers to produce those people were made in

1 The Judge mentioned in his order in ruling the  
 2 word "proportionality." I understand we asked for 67  
 3 and the Judge has given us four, if you consider J&J  
 4 and JJCI, 30(b)(6) witnesses.

5 JUDGE WOLFSON: Well, it's also possible on a  
 6 30(b)(6) witness that somebody may identify two or  
 7 three people that are responsive to the request of a  
 8 30(b)(6) witness. Sometimes it's not just one witness  
 9 that can respond to those subject matters, but I  
 10 understand.

11 MS. PARFITT: You are absolutely correct. And  
 12 that is actually something that we are considering as  
 13 well because there are four areas that Judge Pisano  
 14 has identified that we could discover.

15 JUDGE WOLFSON: And it's up to them to  
 16 identify that there may be more than one person that  
 17 needs to respond to those 30(b)(6).

18 MS. PARFITT: Correct.

19 So I guess the question I would ask the Court  
 20 before we go down perhaps this other path of filing  
 21 the objections and indicating to the Court why we  
 22 believe that the ruling is not proper, and I say that  
 23 respectfully, that early on you understand in some of  
 24 the letters that you have read we had proposed four  
 25 deponents for J&J. We had proposed four deponents for

1 an effort to resolve disputes, but the disputes  
 2 weren't resolved.

3 It's always been our position that they don't  
 4 need these depositions for general causation issues.  
 5 So we don't agree with that. We are prepared to go  
 6 forward with the 30(b)(6) depositions hopefully in the  
 7 next 45 days or so. But we shouldn't move backwards,  
 8 and we would ask that the case continue to move  
 9 forward while this appeal, if it's filed, is pending.

10 I would just also note so the Court is aware  
 11 that Mr. Lanier whose partner Mr. Meadow is part of  
 12 the PFC is actively taking depositions of all of the  
 13 defendants' employees in a state court ovarian case in  
 14 Missouri and in a mesothelioma case in Washington.

15 So employees are being deposed as we speak,  
 16 but we need to move forward. Judge Pisano ruled and  
 17 we should accept that.

18 MS. DOTRO: Judge, if I could just be heard  
 19 briefly on behalf of Imerys. I just want to correct  
 20 something that Ms. Parfitt said.

21 THE COURT: Yes, go ahead.

22 MS. DOTRO: Judge, on behalf of Imerys, we  
 23 never agreed to the four witnesses that were requested  
 24 by the PSC. We have objected to them from the start.

25 THE COURT: Okay.

1 MS. DOTRO: I just wanted to clarify that.

2 MS. PARFITT: I just have a couple of  
3 comments.

4 THE COURT: Go ahead. Make your comments and  
5 then I'll speak with you.

6 MS. PARFITT: Thank you.

7 Your Honor, obviously, we feel so strongly  
8 about this. I wouldn't be standing before the Court  
9 if I didn't feel that this is something very relevant.  
10 I have listened to the Court and I respect what you  
11 have said, and we have really tried over the course of  
12 our time with Judge Pisano and with you to work with  
13 the Court. I want to work with the Court. We want to  
14 work with the Court.

15 But the fact that we would be permitted only  
16 four depositions -- and I understand, and I'm with  
17 you, that perhaps that four expands into eight,  
18 perhaps that four expands into 12, depending on the  
19 breadth of the deposition and the topics noted and who  
20 knows what. But that said, your Honor, to be limited  
21 is so prejudicial to where we are now.

22 We are not trying to go beyond the subject  
23 matters that your Honor has indicated are permissible  
24 for purposes of filing these expert reports. We  
25 submitted before Judge Pisano that we were prepared to

1 Pisano identified them as 30(b)(6) witnesses, the  
2 areas that he has said that they have to be prepared  
3 to testify about are broad and they are all of the  
4 areas that you've identified. I'll put that right on  
5 the record.

6 He said you've identified four categories of  
7 information:

8 Composition of the products;  
9 Testing of the products by defendants;  
10 Sampling of the products by defendants; and  
11 Any influence or bias in the published  
12 literature caused by defendants.

13 So he already said that the 30(b)(6) witnesses  
14 are to be prepared on those four areas. He's given  
15 you that, which is why I guess I'm taking some issue  
16 in perhaps how this is being interpreted. What he's  
17 done instead of saying, You pick out your four  
18 witnesses, because maybe those four witnesses aren't  
19 the ones who are going to give all the information and  
20 then we're stuck. You'll have to come back and say, Let's  
21 identify three more.

22 The burden is on the defendants to identify  
23 one, two, three, whatever it might be, of their  
24 corporate representatives that could respond to those  
25 four inquiries.

10 go forward with the Imerys depositions. We could have  
1 done that because they have completed their document  
2 production.

4 It is no small matter that a million  
5 additional documents have been submitted over the  
6 course of September through December. We're not  
7 complaining about our job to get those reviewed.  
8 That's our job. We have taken it seriously. We  
9 understand it. That's our job. I'm not coming to  
10 court wining about that.

11 What I am saying, what we have started to see  
12 already with the examination of those documents is  
13 information that is highly relevant on the general  
14 causation theory, the theory of bias, the theories  
15 with regard to talc is not pure talc powder.

16 All of those issues we are seeing them already  
17 in documents, and all we're asking for is a  
18 compromise. I understand the Court feels is  
19 excessive and Judge Pisano feels is excessive. Four  
20 puts constraints on us to do our job, severe  
21 constraints for us to do our job. Perhaps there is  
22 some compromise that all the parties can come to.

23 JUDGE WOLFSON: I hear where you are and I  
24 appreciate your willingness to compromise as well.

25 I think at this point, frankly, while Judge

12 I would find it surprising if, for instance,  
2 for J&J, I won't speak for Imerys or PCPC, which are a  
3 little more limited, but as to those areas with J&J  
4 that there might be only one person who would really  
5 be prepared to respond to those, my view is it is an  
6 appropriate approach with the understanding being that  
7 it really is the burden on the defendants to identify  
8 the appropriate person or persons.

9 And if what happens is, you are in this  
10 deposition and you are into these four areas and  
11 appropriately into the four areas and sticking within  
12 the four areas and the witness cannot respond, that  
13 wasn't your proper witness. They would have to bring  
14 somebody else back to respond to the questions that  
15 could not be dealt with at that deposition. I think  
16 you get what you need and what you want.

17 MS. PARFITT: Your Honor, if we start down  
18 that path and we find that it is not working for us --

19 JUDGE WOLFSON: Then you come back.

20 MS. PARFITT: And I do appreciate that, that  
21 we need to revisit the numbers of depositions. That  
22 would be a helpful process that we knew we could come  
23 back to the Court and say, Your Honor, we have not  
24 been able to properly get the information.

25 JUDGE WOLFSON: You'll go to Judge Pisano

1 first when you say "the Court."

2 That's why I see this as workable because it  
3 is the four categories that you have identified and  
4 they have to be witnesses that can adequately testify  
5 and be prepared to do so on those four areas.

6 As I said, if it turns out they didn't give  
7 you the right people or the right person, yeah, you  
8 have the right to come back and say, This is what we  
9 did not get and that we still need and this is one of  
10 the four categories and we need someone else.

11 MS. PARFITT: Your Honor, if I may, one of my  
12 colleagues, rather than me trying to read his  
13 handwriting, I would appreciate it if he could say  
14 something.

15 THE COURT: Okay.

16 MR. TISI: There were other areas that we  
17 identified, and I understand that Judge Pisano was  
18 trying to synthesize a fairly lengthy discussion that  
19 we had, but there were other areas that we identified  
20 that I think are very specific.

21 JUDGE WOLFSON: Like what?

22 MR. TISI: For example, there are documents --  
23 it's very difficult for us to put our work product out  
24 on display here, but I think I have no choice. We are  
25 put in that position.

1 this point.

2 So I don't think I'm going to buy your  
3 arguments. So I'm not sure what else you want to add  
4 to this, but I'm not buying it on that.

5 MR. TISI: Except, for example, Daubert makes  
6 clear there are many different kinds of evidence that  
7 experts can rely on. One of the things they can rely  
8 on are the opinions of other scientists.

9 And so if they have other scientists that  
10 agree to those topics, then I think those are the  
11 kinds of things our experts can rely on in support of  
12 their opinions. They are not limited to published  
13 peer-reviewed literature. In fact, that's the point  
14 of Daubert.

15 No. 2, another example, I have seen documents  
16 that have been produced that deal with the ovarian  
17 cancer causation algorithm. There are documents that  
18 deal with how you look at the issue of causation.

19 Now, if our experts get up and say, there is a  
20 standard methodology for actually looking at causation  
21 for ovarian cancer and our experts agree with what  
22 they wrote in their documents, that's something our  
23 experts can rely on.

24 So we shouldn't be put in a position, at least  
25 I would argue, your Honor, we shouldn't be in a

1 For example, there are documents that we have  
2 seen where the defendants have -- despite what they  
3 said on science day, where they agreed that there are  
4 biologically plausible mechanisms whereby talc gets  
5 into the ovaries. They made that an issue in this  
6 case on science. It's in the documents. We should be  
7 able to do that.

8 JUDGE WOLFSON: I've already dealt with this.  
9 Let me just say, I'm not sure where else you are going  
10 with this. I think we're not going to be on the same  
11 page, Mr. Tisi.

12 I said to you, in fact, and it was quoted in  
13 the transcript to Judge Pisano when I said, Sure, if  
14 you think there is some admissions in those documents,  
15 I said, that works very well and very nicely for you  
16 at some point in a trial, but that's not going to the  
17 science itself.

18 Right here what you have identified is, in  
19 these categories, testing. When you are talking to  
20 somebody about testing, it's also going to identify  
21 what was in there, what they found. Sampling, the  
22 composition.

23 Frankly, unless you think what you are saying  
24 is that they have some better experts or science here  
25 that you want to know about, that's not their job at

1 position where our experts are opining in a vacuum  
2 that is --

3 JUDGE WOLFSON: It's not a vacuum. They have  
4 the documents.

5 MR. TISI: Well, the defendants, I can see  
6 very clearly they'll say, Well, the plaintiffs  
7 cherry-picked documents. The plaintiffs are taking  
8 documents out of context.

9 There is nothing like having a witness before  
10 you that says, This is your document. You wrote it.  
11 What did you mean when you wrote it?

12 That's why those kinds of things are very  
13 important.

14 JUDGE WOLFSON: But that also goes to whoever  
15 your 30(b)(6) is that's going to talk about the  
16 testing that would include that. That's already an  
17 identified topic. These are broad topics.

18 Have a seat, Mr. Tisi.

19 They are very broad topics and, frankly, I  
20 thought, Judge Pisano really gave you everything you  
21 wanted without having you select the people to be  
22 deposed because it is extremely broad.

23 What you might have at some point, obviously,  
24 is some dispute during the dep, whether it's going  
25 beyond the parameters or not, and frankly you should

1 get him on the phone. You should tell him the day  
 2 that you are doing the deps and he has to be available  
 3 for you to call to rule on a particular question.

4 I don't want to do it later on when the  
 5 transcript is done and the witness is gone. And that  
 6 may be some of the disputes of whether it falls within  
 7 the parameters or not, and we'll take a look as to  
 8 whether these people were prepared to answer the  
 9 questions that fall within these topics.

10 So where I am is, they are extremely broad.  
 11 They go to the general causation. We'll see if they  
 12 pick out the right people or not and whether you need  
 13 something more after that.

14 Yes, Ms. O'Dell.

15 MS. O'DELL: Your Honor, we would like 14 days  
 16 to craft the notices and serve them, if the Court  
 17 would allow that, and then once they are served I know  
 18 there will be some discussion back and forth,  
 19 objections.

20 But once we've agreed on a notice that we'll  
 21 would go forward on, we would like the defendants to  
 22 identify who the witnesses will be within seven days  
 23 prior to the deposition, whenever that's agreed to, so  
 24 we can know who the witness is.

25 JUDGE WOLFSON: I don't think, Ms. Sharko, you

1 Who wants to show up at the deposition and  
 2 start having disputes: I didn't know you were going  
 3 to ask about that. We think that's outside the scope.  
 4 Now, let's call Judge Pisano to see if it's outside  
 5 the scope.

6 It's a great idea. So what do you want? You  
 7 want 14 days for your notice, and then you'll  
 8 negotiate out whatever you need. And once it's  
 9 resolved, seven days before you'll identify who will  
 10 be produced.

11 I'm speaking to Ms. Sharko, but you know I'm  
 12 directing it to all of you.

13 MS. SHARKO: And they'll identify the  
 14 questioner? We'll have one questioner?

15 JUDGE WOLFSON: You are saying who on their  
 16 side is going to be taking the deposition?

17 MS. SHARKO: Right. That's become standard in  
 18 some of the MDLs I'm involved in.

19 MS. O'DELL: We will identify the questioner.  
 20 But we may not do it seven days in advance because  
 21 that's going to take us, once we know the witness --  
 22 JUDGE WOLFSON: I get it. They just want to  
 23 know in advance.

24 MS. O'DELL: Another thing, your Honor, we  
 25 might as well deal with while we are here, we

1 would have an objection to that, would you?

2 MS. SHARKO: I don't have an objection to  
 3 identifying the witness seven days beforehand. I  
 4 would hope that the plaintiffs will identify the  
 5 questioner.

6 But I am concerned about this idea that we are  
 7 going to craft and negotiate notices. Judge Pisano  
 8 already did that for us. He told us what the topics  
 9 are.

10 THE COURT: Frankly, I think it is a good idea  
 11 that she's suggesting. He's given you the topics. I  
 12 think they could be now a little more specific of what  
 13 within those topics they are looking to have answered  
 14 so that nobody does shows up at the deposition  
 15 surprised.

16 And if you think they are outside of the  
 17 parameters of the four topics, you can have that  
 18 discussion with Judge Pisano to make sure it's  
 19 narrowed or not before the deposition. That's why it  
 20 makes sense.

21 You may all have very different views of what  
 22 falls within those categories. I think a more  
 23 specific notice works great and you can negotiate it  
 24 and go to Judge Pisano if you have disputes  
 25 beforehand.

1 anticipate the defendants will say, You are limited to  
 2 seven hours. If there's going to be six depositions,  
 3 we believe that's not reasonable.

4 JUDGE WOLFSON: I'm not limiting you to seven.  
 5 If you want to negotiate the time period, if there is  
 6 a limit on time period, go ahead to Judge Pisano first  
 7 and do that. You are going to be talking to him after  
 8 the notices. I know it. So you can talk to him about  
 9 the time limits.

10 Look, these are broad topics and I don't see  
 11 it being done in seven days. So I will tell you  
 12 before you even go to Judge Pisano you could let him  
 13 know, I would not be anticipating it simply a one-day  
 14 deposition of seven hours.

15 MS. O'DELL: Thank you.

16 THE COURT: All right.

17 You have something, Mr. Placitella.

18 MR. PLACITELLA: Just in my role as liaison  
 19 because I just went through this with Johnson &  
 20 Johnson and maybe we could have the same issue. I  
 21 would hope that, as part of the process, they would  
 22 identify the documents that they used to prepare the  
 23 witness on that issue.

24 In the state court I just took their corporate  
 25 rep on a narrow issue and they took the position,

1 which was overruled, but they took the position that  
 2 whatever they showed that witness to prepare them for  
 3 a 30(b)(6) --

4 JUDGE WOLFSON: Is work product.

5 MR. PLACITELLA: -- is work product.

6 THE COURT: And it is. Under our federal  
 7 rules it is.

8 MR. PLACITELLA: If that's the position  
 9 they'll take, we would like the opportunity to address  
 10 that up front. We can do it with Judge Pisano.

11 JUDGE WOLFSON: You can. But, look, it's been  
 12 a long time since I was a Magistrate Judge, but I  
 13 dealt with these issues all the time.

14 The proper question is not, What were you  
 15 shown to prepare for your deposition? You are  
 16 supposed to ask pointed questions and refer to actual  
 17 documents: Have you reviewed this document and what  
 18 do you say about this?

19 And that's using your own knowledge of what  
 20 you think is relevant to the issue. But you can't ask  
 21 the question simply: Tell me what you were shown by  
 22 your attorneys to prepare for this deposition and that  
 23 you reviewed in preparation.

24 That's work product.

25 MR. PLACITELLA: That's what will take some

1 raising the issue because I know it will be an issue  
 2 and I would rather not get to the deposition and have  
 3 a problem.

4 THE COURT: Okay.

5 Ms. Sharko.

6 MS. SHARKO: Judge, two things: One is I  
 7 believe that Mr. Ashton is dead. So if we are going  
 8 to produce him it will have to be by Ouija board I  
 9 think.

10 Secondly, as long as we are raising issues, I  
 11 would like to have the documents the plaintiffs will  
 12 use to question the witness a week or so in advance  
 13 and I think that will definitely expedite the  
 14 deposition.

15 MS. PARFITT: Your Honor, if I may be able to  
 16 respond to that?

17 THE COURT: Yes.

18 MS. PARFITT: We are currently negotiating a  
 19 deposition protocol which we hope to have.

20 JUDGE WOLFSON: Go ahead. I won't usurp his  
 21 role. I'll let you present it to Judge Pisano first  
 22 and try and work it out there.

23 MS. PARFITT: Thank you.

24 THE COURT: And then if you have remaining  
 25 issues, we'll talk about it. And since these deps

1 time to address. I think that's correct. That's a  
 2 correct analysis, if somebody is designated,  
 3 Mr. Ashton is designated, and he's deposed.

4 But when you are a 30(b)(6) witness where you  
 5 are supposed to be the sum total of all the knowledge  
 6 of the corporation on that issue, that that's a  
 7 different analysis.

8 So, for example, if Mr. Ashton spoke to  
 9 Mr. Hopkins, we would have the right to know what  
 10 information he obtained from Mr. Hopkins because he's  
 11 speaking to a specific issue on behalf of the  
 12 corporation.

13 So if Mr. Ashton, for example, was the  
 14 30(b)(6) and he looked at a document to become the  
 15 person most knowledgeable on that subject matter and  
 16 he would not otherwise have been, because that's not  
 17 what he knows from his own personal knowledge, that's  
 18 a different analysis.

19 What I'm raising is, I think we need to flush  
 20 that out. I'm not so sure that that is work product.  
 21 I know that's their position and I understand the  
 22 Court's analysis, if you are designating an individual  
 23 to testify about what his role was. But it's  
 24 different for a 30(b)(6).

25 We can do that with Judge Pisano. I'm just

1 aren't happening for several weeks or whatever anyway,  
 2 you are going to have time to work this out.

3 Now, we have signed off on the sample  
 4 protocol. So that's done and we're ready to go  
 5 forward on that.

6 MS. O'DELL: Your Honor, there are two  
 7 protocols. There is one for Johnson & Johnson and  
 8 there has been an agreement now on Imerys, as I  
 9 understand it, and that will be presented to the  
 10 Court. There is a second protocol.

11 THE COURT: Coming.

12 MS. O'DELL: Yes.

13 MS. DOTRO: There is an Imerys version that  
 14 the plaintiffs just agreed to a couple of hours ago.  
 15 So we'll be getting that into the Court quickly.

16 JUDGE WOLFSON: Okay.

17 Now, the status of these cases, the re-filed  
 18 cases and this dispute you have about there were  
 19 459 cases, whatever. But now you claim you have filed  
 20 short form complaints on most of them?

21 MS. O'DELL: I think on all of those cases,  
 22 your Honor, short form complaints have been filed and  
 23 based on the analysis we have been able to do on a  
 24 limited number of cases they were served. There are  
 25 some instances where a technical notice of filing in

1 the master document was not filed. We don't believe  
 2 that is a material deficiency if there is one.

3 It's a little unclear from the compilation of  
 4 orders that control CMO 8 that's not a requirement of  
 5 CMO 8. CMO 8 refers to CMO 2, which doesn't talk  
 6 about a notice. It's actually CMO 3 talks about a  
 7 notice of filing.

8 THE COURT: Now, you've lost me, but, okay.

9 MS. O'DELL: But we believe that it's only as  
 10 to Imerys and PCPC. It's just not clear. There were  
 11 some firms that did the right thing. In terms of  
 12 filing the complaint and serving it, they may not have  
 13 done the technical filing of the notice. We found  
 14 that's not a material defect. We are trying to work  
 15 to address those so it won't be a matter the Court  
 16 needs to deal with.

17 JUDGE WOLFSON: Okay.

18 MS. TERSIGNI: Your Honor, we are fine and in  
 19 agreement with them filing notices. There is one case  
 20 that they moved to dismiss.

21 JUDGE WOLFSON: That's the Summers-West?

22 MS. TERSIGNI: Yes, that they had dismissed  
 23 because we didn't file a notice of appearance in time,  
 24 and we object to that dismissal because we weren't  
 25 aware the case had been filed because we had not

1 We have actually filed more than 60. They are listed  
 2 on the list.

3 So I think if you give the parties some time  
 4 to reconcile the list, I think there may be some  
 5 discrepancies we can work out. I think it would not  
 6 be fair to say all of these cases have not been  
 7 re-filed. In fact, they have.

8 Many of them had been filed in New Jersey  
 9 State Court, in California State Court, because for  
 10 those plaintiffs there was no subject matter  
 11 jurisdiction in this court. They were orphans, if you  
 12 will, I've heard Mr. Beisner say. So we have been in  
 13 discussions about those and we just need a little more  
 14 time to go through the list.

15 JUDGE WOLFSON: What kind of time would you  
 16 like?

17 MS. O'DELL: Within two weeks we can go  
 18 through and reconcile it and come up with a strategy.

19 There were also some firms that had one case  
 20 in the MDL. They may or may not have complied with  
 21 CMO 8. I'm not sure. But I would urge the Court to  
 22 give us 30 days to get those firms up and running  
 23 because maybe they weren't aware and didn't understand  
 24 the order.

25 JUDGE WOLFSON: So 14 days for the ones that

26 26  
 1 received the notice.

2 MS. PARFITT: Your Honor, if I may, that is  
 3 actually an Ashcraft case and I can speak directly to  
 4 that. And my understanding is, we have properly  
 5 dismissed this case pursuant to Federal Rule  
 6 41(a)(1)(A)(1).

7 What we did is, we re-filed the case via  
 8 CMO 8, and then we filed a notice of dismissal via  
 9 Rule 41 prior to the service requirements of a 90-day  
 10 window. So there was no answer to be filed because it  
 11 wasn't served within that 90-day window and then we  
 12 dismissed the case.

13 JUDGE WOLFSON: It sounds like it should be  
 14 dismissed under 41. That's just fine. No problem  
 15 from my perspective.

16 Then there is another 358 plaintiffs from the  
 17 multi-plaintiff cases who have not filed short form  
 18 complaints.

19 MS. O'DELL: Your Honor, the list was provided  
 20 to us on Saturday. We are analyzing those. I will  
 21 give you just a few highlights.

22 In at least the 358, 84 of those, for example,  
 23 three of them are plaintiffs for which there were  
 24 verdicts returned in St. Louis. So when those cases  
 25 were removed they came up on the composite complaint.

27 28  
 1 you are looking at, and for those single ones out  
 2 which you'll identify which ones they are in 30 days,  
 3 I can live with that. And I saw the shaking of the  
 4 head "yes" on the defense side, so I think they'll  
 5 live with it, too.

6 MS. O'DELL: Okay.

7 JUDGE WOLFSON: All right.

8 And then apparently you are working on these  
 9 duplicate filed cases as well. And the time table for  
 10 that?

11 MS. O'DELL: If we could also have 30 days for  
 12 that just to sort it out, I don't think that's going  
 13 to be an issue.

14 JUDGE WOLFSON: That's fine.

15 And you gave me your report on the federal  
 16 docket and how many cases we have.

17 Now, with regard to pending motions, I want to  
 18 address the PCPC motion for a moment to dismiss that  
 19 is pending that you inquired about the last time we  
 20 were here.

21 I've now had the opportunity, I think it's 37  
 22 separate states jurisdictions that were involved in  
 23 that motion, and I've had an opportunity now to review  
 24 each of those states what their long arm statutes  
 25 require and what their case law requires because

1 actually on two of them neither one of you briefed it  
 2 properly because if you went to the state law it was  
 3 ruled different than how you were reading it.

4 In any event, where I am with this, and I want  
 5 to be open about it today is, I am fairly confident in  
 6 telling you today and working on an opinion now that  
 7 the motion is going to be granted and I don't think  
 8 that should become as much as a surprise to anyone.

9 So what are we doing here? Why aren't we  
 10 simply just moving ahead and coming up with a protocol  
 11 as you have in other cases of what you want to do  
 12 about re-filing, whether re-filing directly in the MDL  
 13 or going to D.C. or New Jersey where there is  
 14 jurisdiction, those courts.

15 I'll go ahead and issue the opinion. But I'm  
 16 not so sure everybody wants a written opinion out  
 17 there that's going to say what I'll need to say and  
 18 have it as precedent out there.

19 So I leave it up to you. If you want to save  
 20 me the time and everybody the time of moving forward,  
 21 I don't think it's going to be surprising what the  
 22 result is.

23 MS. PARFITT: Your Honor, with the Court's  
 24 permission, could we have just a bit of time? I'm  
 25 hearing what the Court is saying. I understand the

1 THE COURT: You are going to let me know then.  
 2 I want a specific date. Today is the 7th of February.  
 3 So what are you looking at? By the end of next week?  
 4 MS. PARFITT: That's fine, your Honor,  
 5 whatever that date is. I don't have a calendar in  
 6 front of me.

7 JUDGE WOLFSON: The 16th would be the end of  
 8 next week. That's Friday. So by next Friday, the  
 9 16th of February.

10 You'll let your adversary know. But you'll  
 11 let us know because I think what I'm going to do then  
 12 is just stop work on it for the next ten days. We  
 13 have other things that we could be working on here.

14 MS. PARFITT: I'm sure you do, your Honor.

15 THE COURT: So we're not going to be issuing  
 16 that decision.

17 MS. PARFITT: Thank you.

18 THE COURT: I didn't ask you how you feel  
 19 about it, but why would you care.

20 MR. LOCKE: No comment, your Honor.

21 JUDGE WOLFSON: All right.

22 The consumer cases on appeal.

23 What other motions have we got? Anything  
 24 else?

25 MS. SHARKO: No.

1 Court is in the process of actually drafting that.  
 2 Can you just give us a bit of time to reflect and talk  
 3 with our folks?

4 JUDGE WOLFSON: What's a bit?

5 MS. PARFITT: If we could have a week, maybe  
 6 ten days, so we could caucus and get back to the  
 7 Court. If we could get back to you before that, we'll  
 8 do that as well. We won't wait the ten days if we  
 9 have a response.

10 JUDGE WOLFSON: That's fine. But, honestly,  
 11 I'm at a little bit of a loss why that's even  
 12 required, but okay.

13 MS. PARFITT: I appreciate that.

14 There are just some factions and things that  
 15 we just need to talk amongst ourselves. If you give  
 16 us the ten days, if we don't need it, I promise you we  
 17 won't take it.

18 Thank you.

19 THE COURT: As I've said to you, I've done  
 20 this in a couple of cases. It's kind of giving you  
 21 one of these preliminary decisions where the lawyers  
 22 have said: You know, I really rather you not issue an  
 23 opinion on this. We'll go ahead and move ahead.

24 So a word to the wise.

25 MS. PARFITT: Understood. Thank you.

1 JUDGE WOLFSON: What else do you want to talk  
 2 about today? I have one other issue before you tell  
 3 me. Anything else?

4 MS. SHARKO: A deadline for plaintiffs' expert  
 5 reports.

6 JUDGE WOLFSON: I think Judge Pisano put that  
 7 in his proposed order.

8 MS. SHARKO: He did, but it's left kind of  
 9 open. I'm really concerned.

10 JUDGE WOLFSON: He left it open because he  
 11 wants to tie it to the date of receiving test results  
 12 on the samples, and I'm in agreement with that.  
 13 Absolutely.

14 That's why you can't have a specific date  
 15 because we don't know when you're going to get your  
 16 test results on the samples.

17 MS. SHARKO: So our concern is that that could  
 18 be spun out for a very long time.

19 JUDGE WOLFSON: I don't know how long is long.  
 20 You have a testing protocol. So under that testing  
 21 protocol what would it go out to?

22 MS. SHARKO: So in theory -- well, actually,  
 23 specifically, the order was entered on January 31,  
 24 although the plaintiffs have had the inventory samples  
 25 for many months now. They have until March 2 to

1 identify the samples they want to test. And then we  
2 have 14 days to object to that. If the objections  
3 aren't resolved it goes to Judge Pisano.

4 He hypothesized that the testing would be  
5 completed by mid-June, and so, okay, that works I  
6 guess. I think it could probably be done sooner. But  
7 if the plaintiffs, for example, take the position that  
8 every single sample known to human kind, and there are  
9 a lot on our list and Imerys' list that have to be  
10 tested, that could take a very long time and we're  
11 concerned about that.

12 THE COURT: We'll come back and see where we  
13 are. I'm not having the reports until the sampling is  
14 done. I'm in agreement with that conclusion of Judge  
15 Pisano. So I'll save you time on that, too.

16 MS. DOTRO: The only thing that I would just  
17 add to what Susan was saying on that front, and I  
18 think it's where we are on this as well, at the  
19 meeting with Judge Pisano on this issue the plaintiffs  
20 indicated they planned on testing every single Imerys'  
21 sample. There are 248 of those and that each test  
22 would take three days per sample.

23 So I think that's where the concern is coming  
24 from on the defense side. That's two years of testing  
25 based on what the plaintiffs said.

1 about with Judge Pisano whether that's reasonable on  
2 the sampling. You are going to be issuing objections  
3 within two weeks anyway, and if it has to be resolved,  
4 it will be resolved and then we'll see what timing  
5 that gives us.

6 Ms. Sharko, you have something else?

7 MS. SHARKO: Just as to the samples, I think  
8 it would be really helpful, if the plaintiffs do not  
9 think they can complete their testing by mid-June, as  
10 Judge Pisano wrote in his opinion, if they could let  
11 us know that and why within say two, three weeks that  
12 would be very helpful in keeping the litigation moving  
13 along.

14 MS. O'DELL: Your Honor, we'll identify the  
15 samples according to protocol that we want to test on  
16 March the 2nd for J&J, and whatever that is, the next  
17 few days after that for Imerys, and they have 14 days  
18 to object, we have 14 days to respond, and I think  
19 Judge Pisano can take up any disagreements from there.  
20 But in terms of the timing, I'm not prepared to talk  
21 about a specific number of samples today.

22 JUDGE WOLFSON: That's still coming down the  
23 pike.

24 That dealt with the issues you have. I have  
25 one that I would like to address with you, which is:

34

36

1 THE COURT: No, no, that can't happen.

2 MS. O'DELL: Your Honor, let me just respond.  
3 We are looking at the inventories. They are a  
4 number of samples that have been identified. More  
5 than 700 for J&J. Ms. Dotro is right. There are 245,  
6 48 of those. It will be a subset of those that we  
7 test. We need to -- let me say it this way.

8 Our experts are evaluating the samples that  
9 should be tested. It will be a subset. It's going to  
10 take us, once we agree on the samples that are going  
11 to be tested, it's going to take us 90 to 120 days  
12 because it takes three days.

13 We are working on that. It will be a subset.  
14 I'm not prepared to say what samples today because the  
15 experts are still working on that analysis and that's  
16 a very critical part of this. But we will identify  
17 them on March the 2nd for J&J, and then we have  
18 30 days from the date the order for Imerys is  
19 entered which --

20 JUDGE WOLFSON: So if we are going to enter  
21 that today or tomorrow, it will be 30 days from then.

22 MS. O'DELL: Yes.

23 THE COURT: So it puts us to the first, second  
24 week in March for that.

25 And then we can talk about, or you'll talk

1 As we all know when we had science day it was  
2 based upon theories that had been out there for quite  
3 some period that had been tried in other  
4 jurisdictions, et cetera, and asbestos never came into  
5 it. And indeed as of today, I'm not aware of a single  
6 expert that has opined on the science of asbestos and  
7 ovarian cancer.

8 That is an important issue for me. I know the  
9 cases that are being tried out there right now, for  
10 instance, the Middlesex case is a mesothelioma case  
11 which everyone knows asbestos has been linked to  
12 mesothelioma. And, frankly, I'm not aware of what  
13 other cancers asbestos has ever been linked to.

14 MR. PLACITELLA: I can supply the Court with  
15 studies. There are actual studies, historical  
16 studies, tying ovarian cancer to asbestos exposure  
17 going back many, many decades.

18 JUDGE WOLFSON: Well, this is what I want. I  
19 don't want the studies. This is what I would like to  
20 have, though.

21 MR. PLACITELLA: Including IARC, by the way.  
22 JUDGE WOLFSON: I want a preliminary expert  
23 report, not your final report that we have been  
24 talking about with samples, et cetera. I want a  
25 preliminary report that explains the science and an

1 opinion why asbestos used as it is in this case can  
2 cause ovarian cancer. I think the Court should get  
3 that. I think the defendants should get that at an  
4 early stage.

5 That's not based upon what we're talking  
6 about, how much is in there in these samples that  
7 we're going to find. It's the science of can it do  
8 it? I would like to get that within 60 days, please?

9 MS. O'DELL: Your Honor, just to put context  
10 on it.

11 Our position has always been talcum powder  
12 products -- I know you saw it in the transcript before  
13 Judge Pisano -- talcum powder products cause ovarian  
14 cancer. Asbestos is something that has been shown to  
15 be a component of talcum powder products. There are  
16 also other things that are carcinogens not to mention  
17 talc, but also nickel, chromium, et cetera.

18 Asbestos is certainly something we can spend  
19 time on. I just don't want the Court to be  
20 misunderstanding our theory. It's the talcum powder  
21 products.

22 JUDGE WOLFSON: I understand it is. But to  
23 the extent that you are focusing on particular  
24 components of talc and asbestos, nickel, chrome,  
25 whatever it is, as being the carcinogens that can

1 I want to see an expert. It may not end up  
2 being the expert you will use in this case. I'm not  
3 committing that it would have to be the expert that  
4 you would use as a testifying expert in this case.

5 MS. PARFITT: That was one question I had,  
6 your Honor. That was one question, your Honor, with  
7 regard to who that person is, and again the  
8 parameters. Again, we're hearing this for the first  
9 time. It's unusual to have this kind of request. I  
10 must say at this stage it's not something that I'm  
11 familiar with in my years of doing this.

12 So there may be some other questions we have  
13 of the Court as to what that looks like.

14 THE COURT: Okay.

15 MS. PARFITT: I hear what you are saying, a  
16 preliminary report. I think what you are asking is,  
17 you want a respected scientist who has consumed these  
18 studies himself or herself and can opine in the  
19 fashion that you have that they are relying on. IARC,  
20 that's okay. We don't have to reanalyze that entire  
21 report. That can be somewhat of a reference, a  
22 reliance piece of material.

23 Is that generally what you're looking for?

24 JUDGE WOLFSON: Whatever it is that you want  
25 to say because I don't know that you have anybody out

38

40

1 cause ovarian cancer, I did not see the science on  
2 that specifically.

3 I know you said talc overall. But now you are  
4 clearly focusing on components. And I would like to  
5 get some preliminary report that those components, the  
6 science of it, are capable of causing ovarian cancer  
7 and I would like to see it now because that has not  
8 been out there.

9 So that's why I said 60 days for that. Not a  
10 completed final report. And so it is clear, I'm  
11 suggesting it as a preliminary report.

12 MS. O'DELL: Your Honor, can I propose just  
13 like in science day where the lawyers made arguments  
14 for both sides, would the Court be open to the  
15 plaintiffs presenting a white paper or presentation to  
16 the Court?

17 JUDGE WOLFSON: No. I want to see an expert  
18 that's going to tell me this. There's not been yet  
19 one expert in any of these cases, my understanding is,  
20 that has talked about these components. I want to see  
21 that because a lot is being focused on this now and I  
22 want to know about it. I want to understand it. And  
23 not how you'll present it by having reviewed the  
24 studies yourself. You are all terrific lawyers and  
25 you'll make the arguments.

1 there who has actually done -- you said there are  
2 studies out there?

3 MR. PLACITELLA: The science is pretty strong  
4 on that issue. I'll talk about the other issues.

5 MS. PARFITT: So those were two clarifications  
6 because you have really narrowed it to just asbestos  
7 and a lot of --

8 JUDGE WOLFSON: I said chrome, nickel, too.  
9 Throw them in.

10 MS. PARFITT: Throw in all the contaminants.

11 THE COURT: Throw in all the contaminants so  
12 we know what we are dealing with in this case. I  
13 understand in the end it's the talc product.

14 You made clear to me at the outset after we  
15 had science day when you came in and you started  
16 talking about asbestos and talc, and you said: We  
17 haven't done this before which is why we need to look  
18 at this very carefully. And, no, we haven't presented  
19 that. And we haven't had experts on this before.

20 So, therefore, not only wasn't it part of your  
21 science day, it hasn't been part of the other cases.  
22 Well, if you want to make it part of this case, I need  
23 to see it because we are also talking about general  
24 causation. The basis for that is, we are going off  
25 into all this discovery on general causation.

1 MS. PARFITT: If I can be clear, though, your  
 2 Honor, the experts that have testified in other cases,  
 3 when they have said, My opinion is talcum powder  
 4 products can cause ovarian cancer -- they have  
 5 actually been saying that.

6 So I just want to be clear to the Court  
 7 whether we were clear in our presentation on science  
 8 day and obviously not clear enough. When those  
 9 experts in other cases -- and again take whatever  
 10 court that the cases have been tried -- those experts  
 11 that have been proffered have said that because the  
 12 studies they have relied upon, epidemiological, for  
 13 instance, are talking about talcum powder products,  
 14 whatever that is, whatever those contaminants and  
 15 components.

16 So the record is clear, though, that has been  
 17 produced. This isn't first instance. They have said  
 18 that.

19 JUDGE WOLFSON: It was not presented that way  
 20 on science day, certainly, and broken down that way.

21 Indeed, you told me at some point in time when  
 22 you have talked about experts and you said: No, we  
 23 won't necessarily be using the same experts and you  
 24 certainly will be getting new experts on these issues  
 25 to opine, I took that to be that there is going to be

1 court case. I don't know what happened in your  
 2 hearing. But certainly reading Judge Johnson's  
 3 opinion, there is no mention of any of those things in  
 4 there.

5 So it really is, I think, however your theory  
 6 is now developing and refining itself, I haven't seen  
 7 it and I don't think that it was an oversight on  
 8 science day. I think there is a focus that may be  
 9 changing here now.

10 Let's see what backs that up just as you tried  
 11 to attempt to do by relying on things on science day  
 12 where there had been experts that have opined and  
 13 studied. So let's get somebody that's going to be  
 14 willing to opine on this issue that's not the lawyers.

15 MS. O'DELL: Your Honor, we hear what you are  
 16 saying. We understand it. You say preliminary. We  
 17 would like to ask that this report not be --

18 JUDGE WOLFSON: I know what you are going to  
 19 say. Go ahead. Finish it.

20 MS. O'DELL: Just for the record, this would  
 21 not be something that would be used against the expert  
 22 in a future Daubert motion. This would be something  
 23 that would be prepared for the education of the Court  
 24 as requested, but not be something that could  
 25 potentially prejudice an expert or experts we might

42  
 1 a different look taken at this. And some of these  
 2 things that are being mentioned, I did not hear nickel  
 3 and chrome on science day. I did not hear asbestos on  
 4 science day. I want to see what we're talking about.

5 MS. PARFITT: I just want to be clear so the  
 6 record is clear, that when our experts and other  
 7 experts have testified, when they talked about talcum  
 8 powder products, it has been the asbestos, the  
 9 chromium, the nickel, whatever it is that makes up a  
 10 talcum powder product.

11 I think I understand what the Court wants. I  
 12 just want it to be clear that this is not the first  
 13 time that that has been presented. We did not mean  
 14 during the science day to -- perhaps we could have  
 15 elaborated more so than we did to make it clearer to  
 16 the Court.

17 What we're trying to get at now is and the  
 18 reason for all the sampling and all of that  
 19 information is to ascertain: Is there asbestos in  
 20 every single one of those talcum powder products? Is  
 21 there nickel in every single one? The percentages of  
 22 that in any particular talcum powder sample. We are  
 23 looking at that aspect, too.

24 JUDGE WOLFSON: And it doesn't appear that  
 25 your experts ever talked about it I guess in the state

44  
 1 ask to do this.

2 JUDGE WOLFSON: I thought that's what you were  
 3 going to request.

4 Ms. Sharko, I'm sure you have something to  
 5 say.

6 MS. SHARKO: Yes, we agree with your Honor's  
 7 understanding of how these cases have progressed so  
 8 far.

9 I just want to note that I believe that there  
 10 will be a Daubert issue on whether the plaintiffs'  
 11 experts can prove through scientifically sound  
 12 methodology and science that our product contains  
 13 asbestos or chromium or nickel or whatever the element  
 14 of the day is because we dispute that.

15 We don't agree that our product contains those  
 16 things, and I recognize this awaits their sampling and  
 17 their discovery and all that.

18 JUDGE WOLFSON: So are you suggesting that I  
 19 should put off what I requested and wait until we see  
 20 if it's there?

21 MS. SHARKO: No, not at all.

22 JUDGE WOLFSON: It certainly sounded like  
 23 that.

24 MS. SHARKO: No, not at all.

25 When Ms. O'Dell said, We know it all contains

1 asbestos, we disagree with that. That's all.

2 THE COURT: Go ahead, Mr. Placitella.

3 MR. PLACITELLA: So I think the asbestos issue  
4 is pretty easy to get to you in 60 days. My concern  
5 is as follows:

6 We are going to constituent test a wide  
7 variety, scope of samples that they are going to give  
8 us. And if it turns out, for example, that there is  
9 polyvinylchloride in 70 percent of the samples, I just  
10 want to be clear that we're not there yet.

11 I think asbestos, that's an easy thing to deal  
12 with. But we don't actually know what's in these  
13 products all the way down the line. That's what we've  
14 been fighting about and the reason we are doing the  
15 testing.

16 JUDGE WOLFSON: I hear you there.

17 So are you suggesting that you don't know if  
18 there is chrome and nickel in the product either?

19 MR. PLACITELLA: We know it's there. It would  
20 be good to know the extent of which. Over what period  
21 of time, we don't know that yet.

22 JUDGE WOLFSON: So I'm focusing on those  
23 three. And it's not precluding you if you're going to  
24 find some other as you would call it contaminant and  
25 opining on that at some later point.

46

1 Let's focus on those three elements on some  
2 preliminary report as to the science. That was my  
3 issue.

4 If the attorneys don't have anything else, I  
5 think we're done for the day.

6 Do we have another date on the schedule?

7 We can go off the record.

8 (Off-the-record discussion.)

9 THE CLERK: All rise.

10 (Proceedings concluded.)
